

## How to Write The Perfect Blog

How you structure your blog post can make all the difference on whether your post shows on the search engine results. Having a blog can be a great way to connect with your audience and share your knowledge. It's also a way to establish yourself as an expert in the property management industry.

## Blog Post Structure

### <H1>Headline / Title <H1>

A question or eye catching subject.

### Intro Blurb

1-2 sentence answer to your question or headline. Google specifically likes to see the answer close to your question, resulting in your post being at the top of the search results.

### Image/Video

Be sure to include a high resolution image in all your blogs that is relevant to your post. Video is even better! Once you have finished writing your blog, shoot your video! Your video can be as short as your question and answer or the entire content of your blog!

### Content

AKA the meat of your blog! Who, what, where, when, why! Who / what are you talking about? Why is it important to your readers? When should they do what you say? How should they do it? Provide specific instructions for your reader to follow.

### Recommendations

Finalize your content with what your recommendation is. How would your company handle this, what would you do differently? Make the reader feel like it'd be easier to choose your company to solve the issue!

### CTA or Call To Action

Don't forget to have a way for the reader to contact you if they want to learn more! We recommend adding the lead form on the side so it can be completed at any time!

<H1> Headline / Title <H1>

Image/Video

Intro Blurb

Content

Recommendations

Call To Action!

Additional Links

### Additional Links

Link to relevant blogs or pages within your website the reader would find relevant. This is a good way to increase time on site by keeping the reader on your site!
